# Description

Chomper is a mid-maturing sorghum x sudan forage

## **Market Segment/Target**

Suitable for grazing, hay, haylage and greenchop

## Features

- Large seed size
- Good early season vigour and quick regrowth after cutting or grazing
- High leaf to stem ratio

## Benefits

- Quick to first cut or grazing due to growth rate
- Potential to obtain multiple cuts or grazing even with later season plantings
- Flexibility of Chomper allows the use for grazing, hay and greenchop with either sheep or cattle

# **Harvest Height**

| Grazing                 | initial graze/cut 1m |  |  |  |  |
|-------------------------|----------------------|--|--|--|--|
|                         | re-graze/re-cut 0.5m |  |  |  |  |
| Hay/Haylage             | 1-2m                 |  |  |  |  |
| Greenchop               | 1.5m                 |  |  |  |  |
| Days to first cut/graze | approx 50            |  |  |  |  |
|                         |                      |  |  |  |  |

# Chomper Forage Sorghum

Sorghum x sudan grass hybrid

- Chomper is a versatile hybrid sorghum x sudan grass that can meet most summer forage needs
- It is well suited for use as an emergency feed because of its options for use in grazing, hay, greenchop and haylage
- Chomper has good leaf to stem ratio that helps provide good quality feed with proper management
- Sowing rate and row spacing can affect stem thickness, consider intended use and moisture availability when selecting sowing rate
