

SuperSun 66 Sunflower

Helianthus annuus

Seeding Rate	seeds/ha
Marginal dryland	25,000-35,000
Dryland	30,000-45,000
Irrigation	45,000-60,000

Seed Treatment Cosmos Insecticide

Description
Hybrid polyunsaturated black seeded sunflower

Market Segment/Target
Polyunsaturated oil production (crushing)
Dehulling for confectionary market

Features

- Mid to full season maturity with excellent standability
- Semi pendulous heads
- Resistance to Leaf Rust, Albugo, White Blister and Alternaria

Benefits

- Proven to perform under marginal dryland conditions
- Plant population can be modified based on expected field and seasonal conditions without changing varieties
- Semi pendulous head reduces sunburn, head rot and potentially bird damage
- Excellent yield potential under favourable conditions and irrigation
- Potential access to premium human consumption dehulling market due to large plump seed size under favourable conditions

- SuperSun 66 is a medium to tall, medium to full season variety, adaptable to a wide range of environmental conditions and sowing times
- SuperSun 66 has shown excellent yield potential from marginal dryland to favourable and irrigated crop situations
- SuperSun 66 plant population should be adapted based on expected field conditions to maximise kernel size and head filling
- Potential to capture both polyunsaturated oil crushing market and premium human consumption market based on seasonal conditions
- Multiple sowing windows in Northern NSW, Southern and central Qld
- Manage sucking pests for best result for both yield potential and oil quality
- Avoid areas with parthenium weed or increase sucking pest management as known parthenium is a known host for Tobacco Streak virus

Rating scale: 1-9
1 - not recommended
9 - excellent

At S&W Seed Company Australia we're so confident about our seed genetics and seed quality, we will replace seed at half the original purchase price if it fails to establish satisfactorily in the first thirty days. Terms and conditions apply.
