

# Tanami Grain Sorghum

*Sorghum bicolor hybrid*

<b>Seeding Rate</b>	<b>kg/ha</b>
Marginal dryland	1.5-2.5
Dryland	2.5-5
High Rainfall/Irrigation	4-6
Soil temp for optimal establishment	16°C ↑

**Seed Treatment** Enhanced

**Description**

Medium-quick maturity red grain sorghum

**Market Segment/Target**

Feed grain

**Features**

- Highly drought tolerant
- Midge rating 5
- Bright red grain
- Seed size 28-32,000 seeds/kg

**Benefits**

- High staygreen and low tillering habit for improved drought tolerance and standability
- Good head exertion under all conditions to allow easier, more efficient harvest
- Excellent pollen production for better seed set under adverse conditions

- With stable yield potential and the capacity to endure harsher farming conditions, Tanami Grain Sorghum is a great choice for times when performance is required for in very demanding circumstances
- Tanami is a low tillering medium-quick hybrid with good stay green, making it ideal for more challenging environments
- Combine this with its good pollen production, and it becomes excellent option for maximising yields in a late plant situation
- Tanami has excellent harvest characteristics with a well exerted head and consistent grain size even under stress
- It will deliver when the going gets tough while others fail
