DESCRIPTION

Comprised meticulously of flowering varieties, the Pollinator Blend is designed to stimulate bee activity. Its combination of flowering species exhibits white, yellow and purple flowers, boasting high nectar and pollen levels. Designed for pollination dependant enterprises. Utilised in midrow or exclusion areas for almonds, avocados, macadamias and more.

ESTABLISHMENT GUARANTEE™

At S&W Seed Company Australia we're so confident about our seed genetics and seed quality, we will replace seed at half the original purchase price if it fails to establish satisfactorily in the first thirty days*
